

DEPULVERA ... ADVANCED TECNOLOGY

Depulvera is the only automatic solution to the demand of eliminating dust deposited on books in libraries and in bookshop warehouse and to prevent the cropping up of elements which could damage the integrity of the books, thus jeopardizing their shelf life.

Depulvera is produced by TiGiEmme with quality material and with components which allow for a perfect operation in time and guarantees minimum maintenance.

TECHNICAL FEATURES

- Eliminates dust on external surface of books.
- Single passage to clean every book's parts.
- Dusting system during dusting does not contaminate the surrounding ambient.

TECHNICAL DATA	
Max dimensions of books	mm 140 x 400 x h 400
width of machine	ca. 750 mm
length of machine	ca. 1150 mm
height of machine	ca. 1200 mm
speed of work	12 books/min
electrical supply	220 V - 230 V

Patent EP 1407835

L'AURA... TO CLEAN BIG DOCUMENTS

- L'aura is a semi-automatic equipment that can be used to dust documents, folders, books and files of great dimension. It needs two passages to clean a volume.
- Ideal for archives and libraries (books, documents, folders).
- Minimum dimension to enter in narrow places.
